

FOR IMMEDIATE RELEASE

earlyCASE to Launch New Early Case Assessment Software at ILTA 2008 Conference

earlyCASE to provide attendees an opportunity to demo the FREE Basic version analytics and assessment software

ATLANTA, GA (August 21, 2008) – Atlanta-based earlyCASE, an innovator in advanced early case assessment for electronically stored information (ESI) and eDiscovery, today announced that Tom Strack, CEO will host product demonstrations at ILTA's 31st Annual Educational Conference on Wednesday, August 27, 2008. Conference attendees will have the opportunity to demo the new Web-based application that runs on your local PC and analyzes the ESI your computer can access without ever leaving your computer or network.

earlyCASE allows you to see and understand all of your data before it is processed for discovery. It supports multiple languages, extracts metadata, generates hash values, detects duplicates and creates a local inventory database of documents and e-mails. earlyCASE allows users to make informed discovery decisions and easily cut down the size of data sets through filter and culling rules before going into the discovery process and review.

ILTA's Annual Educational Conference will take place in Dallas, Texas at the Gaylord Texan, August 25-28, 2008. For more than three decades, ILTA has provided peer-networking and information resources to those who support technology in law firms and law departments worldwide. The 2008 conference is an educational opportunity for attendees to gain knowledge of new technology through attending one of the many education tracks, attending software demonstrations, hearing key industry speakers or stopping by any of the 150 legal vendor booths. For more information, visit <http://conference.iltanet.org>.

"Launching earlyCASE at ILTA 2008 is a very exciting time for us," said Tom Strack, CEO of earlyCASE. "earlyCASE offers the legal profession a new standard for early analysis and culling of documents, data and metadata for eDiscovery."

earlyCASE is offered in two versions, a Basic (FREE) version and a Professional version. The Basic version offers 15 high-quality eDiscovery reports, one of which estimates your processing and review budget while providing an

immediate understanding of your data. Through the Professional version, a 26(f) report for meet and confer is available to help clients reduce legal risk exposure by offering a necessary view of the legal case information—custodians, context, third parties, and more. earlyCASE provides you the tools and results to best understand, define and memorialize the ESI going into the meet and confer.

For more information, visit www.earlycase.com. earlyCASE will be offering demos of their software on Wednesday, August 27, from 9:00 a.m. to 5:00 p.m. in the Gaylord Texan, Lone Star Tower, Mustang 1 Demo Room.
